Category:	Vacum pump
Manufacturer:	Elmo Rietschle
Year Built:	2023

Contactless operating rotary lobe vacuum pumps with IE2 motors
Capacities ranging from 485 to 1909 m 3 /hr
Primarily used for producing coarse and fi ne vacuum and for handling gases and vapours, as they can tolerate water vapour and most corrosive gases. Rotary lobe pumps are used, normally, in combination with backing pumps.
Flange mounted motors correspond to DIN EN 60034 and have IP 55 protection and insulation class F.
